

BEFORE SEATED

How Como managed Ramadan reservations.

Paper & WhatsApp bookings

Reservations taken over WhatsApp and paper -- impossible to track.

Manual Excel entry nightly

Staff spent 30-45 min re-entering every booking into spreadsheets.

Double-bookings happened

No live table view meant two guests arrived for the same table.

No guest memory

Returning regulars re-introduced themselves on every single visit.

Every booking auto-appears in Sheets.
No manual entry. No delay.

Each date gets its own tab -- e.g. Saturday 15th Mar

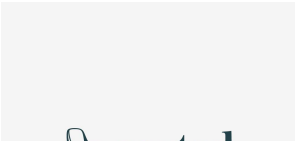

Tabs split by slot: Iftar 5PM -- Dinner 8PM -- 10PM -- Sehri

All 17 tables pre-filled with seating capacity

Name, pax, time, table, phone auto-written on booking

Cancelled reservations automatically clear their row

Bidirectional -- Sheets edits sync back into SEATED

Concrete impact. One month.

x Double-bookings during peak Iftar stressed staff and frustrated guests

v Live table map -- every booking has a confirmed table. Zero double-bookings.

x Walk-ins during busy nights turned away with no record or follow-up

v Waitlist captured every walk-in. WhatsApp sent when a table freed up.

x End-of-night Excel entry took 30-45 minutes of staff time every evening

v Google Sheet updated automatically on every booking. No manual entry ever.

x Callers re-introduced themselves each time. Staff had no context.

v Every call matched to a name, visit count, and last booking instantly.

x No data on which guests were loyal or returned multiple times

v Guest directory tracked every visit. 38 returning guests found this month.
