

SEATED × Como

Ramadan Trial · Feb 18 – Mar 20, 2026

A smart reservation management system —
built for Como's most demanding month of the year.

CONFIDENTIAL TRIAL

Ramadan is Como's busiest season — and their systems weren't ready for it.

' Double-Bookings

Without a live table map, two bookings landed on the same table during peak Iftar.

' No Guest Memory

Returning guests re-introduced themselves every visit. No history on record.

' Missed Walk-ins

Walk-in guests during busy nights were turned away with no record or follow-up.

' Manual Excel Work

Staff spent 30–45 min re-entering bookings into spreadsheets every night.

' Missed Calls

Peak-hour calls went unanswered. No system to identify callers or their history.

SEATED: a custom reservation management system deployed live at Como for Ramadan 2026.

01

Reservations

Live booking dashboard with status tracking — Confirmed !' Seated !' Complete

02

Guest Directory

Searchable CRM of every guest with history, phone, visit count & preferences

03

Table Map

Real-time view of all 17 tables + Teppanyaki bar. See occupancy at a glance

04

Waitlist

Capture walk-ins on a digital waitlist with auto WhatsApp when a table opens

05

Call Tracking

Every incoming call logged and instantly matched to a guest and booking history

1,664

Total Covers

guests served across Ramadan

367

Reservations

logged & managed in SEATED

38

Repeat Guests

returned more than once

How the system worked in practice, every shift.

Before Service

- All reservations visible sorted by time slot
- Staff confirmed table assignments upfront
- Confirmed !' Seated status updated as guests arrived
- Table map updated live — no surprises

During Service

- Incoming calls matched to guest profiles instantly
- Walk-ins added to digital waitlist
- WhatsApp sent automatically when a table freed up
- Orders tracked per table with receipt printing

After Service

- Google Sheet auto-updated with night's bookings
- Guest directory enriched with new visit data
- Analytics refreshed with covers data
- Zero manual data entry required

SEATED auto-syncs to Google Sheets — no manual export, no double entry.

Ø=ÜÅ Each reservation date gets its own tab (e.g. "Saturday 15th Mar")

#ð Each time slot has its own section — Iftar, Dinner 8 PM, Dinner 10 PM, Sehri

Ø>ᵑ' All 17 tables + Teppanyaki bar pre-filled with seating capacities

' Booking fills Name, Pax, Time, Table, Phone & Notes automatically

'L Cancelled reservations automatically clear their row in the sheet

Ø=Ý Bidirectional sync — changes in Sheets update back into SEATED

Real-time insights from the month's data.

Covers by Time Slot

Iftar 5:00 PM

Dinner 8:00 PM

Dinner 10:00 PM

Sehri / Late

Key Insights

Busiest single night
March 17, 2026
195 covers · 32 bookings

Busiest time slot
Iftar 5:00 PM
48% of all covers this month

Peak days
Fri · Sat · Sun
consistently highest covers

Avg party size
4.5 guests
per reservation

Returning guests
38 guests
visited Como more than once

Concrete impact from a single month of using SEATED.

' Double-bookings during peak Iftar hours caused staff stress and guest complaints

!'

' Live table map meant every booking had a confirmed table. Zero double-bookings.

' Walk-in guests during busy nights were simply turned away with no follow-up

!'

' Digital waitlist captured every walk-in. WhatsApp sent when a table opened.

' Guests who called back had to re-introduce themselves every single time

!'

' Every call instantly matched to a name, visit history and their last booking.

' End-of-night Excel entry took 30–45 minutes of staff time every evening

!'

' Google Sheet updated automatically with each booking. Zero manual entry.

' No record of which guests returned, or how loyal they were to the restaurant

!

' Guest directory tracked every visit. 38 returning guests identified this month.

From operational tool to full B2C reservations platform.

COMPLETE

Phase 1 · LIVE

RMS Foundation

Custom dashboard, table management, guest directory, call tracking, Google Sheets sync — built and proven at Como this Ramadan.

Phase 2 · NEXT

B2C Booking App

Guests discover and book Como directly via seated.pk. Real-time availability, instant confirmation, and guest profile creation.

Phase 3 · SCALE

Network Effect

Como listed alongside partner restaurants. Guests build a dining profile. Restaurants share analytics and a guest intelligence ecosystem.
